DO YOU KNOW WHERE YOUR DNA IS?

On Wednesday, December 11 at 6:30 PM in the library, there will be a free presentation by Albert E. (Buzz) Scherr entitled: Do You Know Where Your DNA Is?

The genetic future is now. It is very likely that some commercial, medical research or governmental entity has either your DNA sample or your genetic information. And you don't know it and may not even know that they have collected and stored it. *Do You Know Where Your DNA Is?* takes you through the current state of forensic DNA technology, genetic genealogy, familial searching and wrongful convictions based on post-conviction DNA testing among the many and varied uses of genetic information. So...come and find out why you need to be careful to whom you are related genetically.

Albert E. Scherr is a professor of law at UNH Franklin Pierce School of Law. As a lawyer, he has been litigating forensic DNA issues in state and federal courts for 25 years and continues to advocate for reforms in the use of forensic DNA
